SO WHAT?

Meet Sonar

What is Sonar?

Sonar is an open source quality management platform, dedicated to continuously analyze and measure technical quality, from project portfolio to method.

Sonar is an open source quality management platform, dedicated to continuously analyze and measure technical quality, from project portfolio to method.

- ▶ Display results over time
- ▶ Convert results to issues (instead of meaningless numbers)
- ▶ Framework to fix the issues in a controlled way
- ▶ Quality gate
 - ▶ New code is covered with tests
 - ▶ New code doesn't contain violations

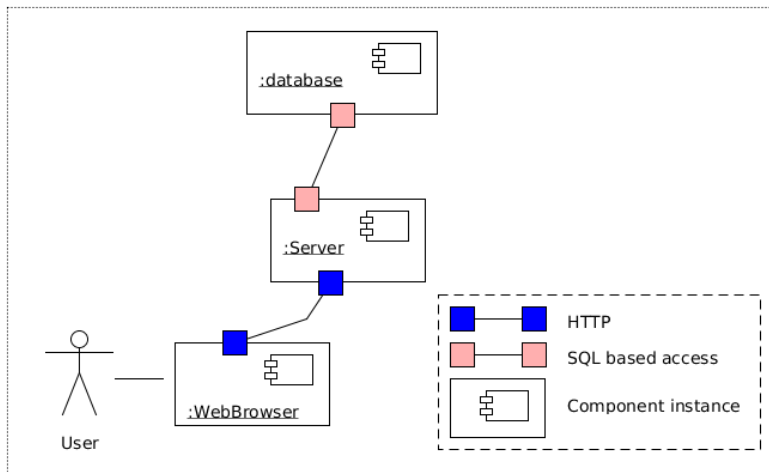

Components of Sonar

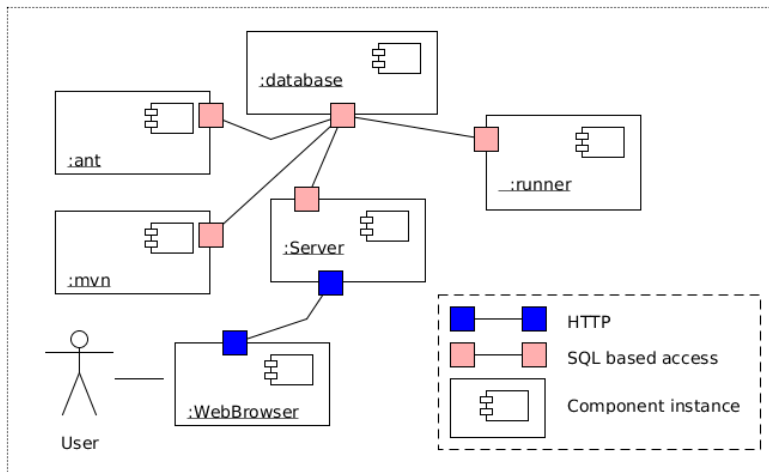

Components of Sonar

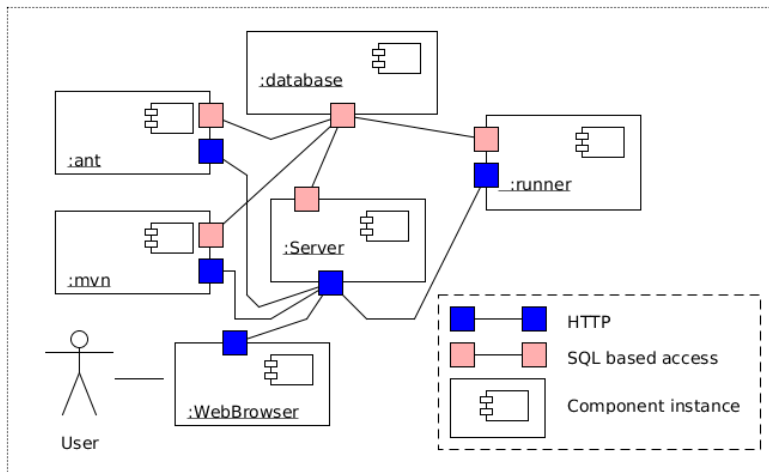

Components of Sonar

Components of Sonar

Components of Sonar

The Analyzer (mvn/ant/standalone)

- ▶ Analyze the code

The Analyzer (mvn/ant/standalone)

- ▶ Analyze the code
- ▶ Upload the results

The Analyzer (mvn/ant/standalone)

- ▶ Analyze the code
- ▶ Upload the results
- ▶ Upload other tool's results (coverage)

The Analyzer (mvn/ant/standalone)

- ▶ Analyze the code
- ▶ Upload the results
- ▶ Upload other tool's results (coverage)
- ▶ Analysis/Preview/Incremental:

analysis Analyse the code and upload the results (daily)

preview Analyse without upload (CI)

incremental Any new issues introduced?

The Server

- ▶ Display Metrics

The Server

- ▶ Drilldown issues
- ▶ Create plans

The Server

- ▶ Display Metrics
- ▶ Drilldown issues
- ▶ Create plans
- ▶ Setup a quality gate

Demo

Demo

- ▶ Create a new project

Demo

- ▶ Create a new project
- ▶ Disable some violations

Demo

- ▶ Create a new project
- ▶ Disable some violations
- ▶ Setup a Quality Gate

I learned them the hard way...

- ▶ Pylint: you have to enable pylint violations in your profile
- ▶ Pylint: use a version that recognises `-f parseable`
- ▶ nose, coverage: had to sed the results for full paths - otherwise they were not found
- ▶ Build breaker: enable in preview mode - settings/general/Plugins accepted for Preview and Incremental modes := `buildbreaker`
- ▶ coverage on new code: Install SCM plugin
- ▶ everything is on github.com/matelakat/sonar-investigation

The End
